**REMARKS**

**I. Specification**

In the "Notice of Drawing Inconsistency with Specification" dated August 21, 2006, a copy of which is included herewith, it was indicated that Figure 5 is contained in the Drawings but not listed in the Brief Description of The Drawings in the Specification. The Applicant has therefore amended the specification to include the proper language with respect to FIG. 5. The amendment presented herein involves inserting proper descriptive language with respect to FIG. 5 between paragraphs [0023] and [0024], which respectively refer to the FIG. 4 and FIG. 5 brief descriptions. It is believed that this minor amendment to the specification now corrects the error noted in the "Notice of Drawing Inconsistency with Specification" dated August 21, 2006. The Applicant requests that this language be entered by amendment into the specification in order to correct the deficiencies noted in the "Notice of Drawing Inconsistency with Specification" dated August 21, 2006.

**II. Conclusion**

In view of the foregoing discussion, the Applicants have responded to each and every item of the Official Action. The foregoing remarks and amendments do not present new issues for consideration and no new search is necessitated. Such amendments are supported by the specification and do not constitute new matter. Accordingly, Applicant respectfully requests entry of these amendments and issuance of the above-referenced patent application with these amendments.

Should there be any outstanding matters that need to be resolved in the present application, the Examiner and/or the Office of Patent Publications/Publishing Division is respectfully requested to contact the undersigned representative to conduct an interview in an effort to expedite issuance of the present application.
